

CA Technologies says z/XDC enables them “to get...new and updated solutions to market faster”, and appreciates the excellent service and quick response time from ColeSoft:

CA Technologies helps customers succeed in a future where every business- from apparel to energy- is being rewritten by software. From planning to development to management to security, at CA we create software that fuels transformation for companies in the application economy. With CA software at the center of their IT strategy, organizations can leverage the technology that changes the way we live- from the data center to the mobile device.

“CA Technologies has used [z/XDC] for development, debugging, and quality assurance since 1991”

CA Technologies has used ColeSoft’s z/XDC product for development, debugging, and quality assurance since 1991. z/XDC helps our Assembler-based software engineers test new code and find and correct errors in development versions of our products more quickly, enabling us to get our new and updated solutions to market faster. We help both our experienced and newly hired engineers by providing z/XDC training and include it in our training programs for incoming programmers.

“z/XDC helps our team understand the architecture of our products”

z/XDC helps our team understand the architecture of our products and how those products interact with z/OS. Our developers leverage its support for multi-tasking programs, batch programs, started tasks, APF-authorized code, cross-address space applications, task mode and SRB-mode code.

“The CA Technologies System z portfolio of products spans code deeply embedded in the operating system and subsystems all the way up to utilities and applications,” said Scott Fagen, Distinguished Engineer, CA Technologies. “z/XDC provides us with a test and debug platform that enables us to quickly isolate and diagnose problems at the instruction level, in real time, as the program executes. These capabilities enable us to bring high quality products to our customers more rapidly and reduce time to resolution when there are problems in the field.”

CA Technologies team also appreciates the excellent service ColeSoft provides, helping us get resolutions to our issues quickly.
